

Internship description

EG 427, a French biotechnology company that pioneers a new approach in gene therapy called pinpoint gene therapy, is looking for its:

Business Development Intern at EG427

6-9 months
Starting before September 2022
Paris, France

Overview

EG427 is a preclinical stage gene therapy platform biotechnology company that is leveraging non-replicating HSV-1 based viral vectors to develop a novel class of innovative therapeutics. Our initial focus on peripheral nervous system (PNS) disorders is based on the unmet need coupled with the high potential of HSV-1 vectors in order to provide major clinical benefit in these areas. With headquarter in Paris, our global footprint gives us the prospect to partner with leading organizations around the world, allowing us to deepen our understanding of disease mechanisms and progression.

Our team was built with deep expertise in gene therapy development, allowing us to efficiently advance our programs from pre-clinical to clinical development. Our experience in viral vector design, optimization and gene therapy manufacturing of herpesvirus viral vectors give us an alternative approach to developing gene therapies. Additionally, we are developing proprietary technology to potentially enable innovative gene therapy treatments in variety of indications.

We are currently seeking a highly motivated and talented intern, to support our **business development** effort. Under the supervision of the VP Strategy, you will have a double task. On a methodology perspective, contribute to **implement the company's tools** to process its business development pipeline. On a more practice level, **contribute to the business development effort** in conferences preparation, meeting organization and follow-up to generate partnership leads. You will also be associated to the **preparation of our next financing round**, to screen potential investors and manage contact database.

Main activities

- Contribute to implementation of BD workflow process in the company's tool
- Contribute to company screening to identify potential targets
- Contribute to conferences preparation (meeting organization, presentation material, ...)
- Contribute to follow-up of existing contacts
- Contribute to investor's identification and contact base management

Requirements

- Business school graduation year or Marketing master – any specialization in the pharmaceutical business would be greatly appreciated.
- Knowledge and interest in biopharmaceutical area is a must, previous internship or experience is a plus
- Organizational and methodological skills – Process oriented
- Very Good MS Office and presentation skills
- Graphic competences is a plus
- Ability to work independently and in cross-functional teams

- Flexibility to work in a fast-paced, start-up environment
- Ability to communicate with a variety of people confidently and effectively at all levels.
- Excellent oral and written communication skills in English

Complementary information

We look forward to receiving your application (as a single PDF file) including:

- Cover letter
- Resume
- Miscellaneous documents (if any) to support your application

Please send your application to info@eg427.com

EG427 is an equal opportunity employer and values diversity within our company. We do not discriminate in any way. We make hiring decisions based solely on your experience, motivation and skills.
